

## Design Assessment Report

A physician performs an examination in order to provide the proper diagnosis - our Design Assessment Report works the same way.

The report is designed to assess the requirements, constraints, and potential roadblocks of your project.

The report provides findings, recommendations, a timeline, and a preliminary budget for your project.

### The Design Assessment Report includes:

- an on-site meeting to discuss your primary objectives and goals for the project.
- a registered architect's professional opinion on project feasibility.
- an outline brief describing functions, uses, spaces, and adjacencies required.
- a review of current site conditions.
- Identifying potential regulatory issues and outline potential solutions
- a conceptual construction budget
- a preliminary project schedule
- a service fee proposal for the next stages of the project
- a professionally produced report
- Follow up meeting to discuss the finding of your Design Assessment Report.

**The report is a stand alone service.  
\*Full project commitment is not required\***

Depending on scheduling, the report will take approximately two weeks to prepare.

Cost \$900.00 inclusive of the initial site visit and follow up report findings meeting.
